

# Infrared Flight Details

Taylor Creek OR-RSF-000395

August 26, 2018 @ 0940

## Priorities:

1. Div EE, Div GG, Div II and Div KK
  - a. Map fire perimeter
  - b. Perform infrared survey

VETS was scheduled to leave Gold Beach at 0730. We did not lift until 0910 due to coordination issues. Arrived at H-135 at 0940. Air was mixed. Heavy smoke in some areas. Started mapping/IR run just west of H-135. First heat signature was located at the south east end of Div GG. Div GG was relatively quiet on the east side. Some Ash piles with occasional creeping fire. On the north end some active fire was observed. On the north end of Div II scattered heat and creeping fire were found. Due to smoky conditions the survey was terminated as we moved south off of the ridge in Div II.
